CURRICULUM VITAE

Nurrachmat Widyasena (b. 1990), known as **Mas Ito**, is an Indonesian artist based in Bandung. A graduate of ITB's Faculty of Art and Design in printmaking, Mas Ito explores retro-futurism by standing at the intersection of reality and fantasy. Positioning himself as a stupid third-world Asian, he humorously reflects on forgotten Space Age ideals and utopian dreams, using low-tech methods to critique Indonesia's technological aspirations. His work—through painting, installation, metal plates, wood, and found objects—reconstructs sci-fi visions with satire and simplicity. While futuristic in theme, Mas Ito's practice comments on the cultural and political ambitions that shaped the Space Age and its global dream for a better future. **Mas Ito is also the co-founder of a geeky fashion brand known as KITC**, continuing his exploration of pop culture and identity beyond the white cube.
